

TAO

follow the light · shape your workspace

dentalart

The image is a promotional graphic for the TAO dental cabinet. The left half features a dark, atmospheric photograph of a dental cabinet's interior. A bright, horizontal green light strip is visible, illuminating the wooden-textured surface of a drawer. The right half of the image is a solid light gray, containing white text and abstract geometric shapes like a vertical rectangle and a large curved line. The TAO logo is positioned in the upper left of the dark section.

TAO

Born from listening, grown with technology

A project that **evolves alongside people.**

Dental Art presents the new TAO, the first cabinet that **guides your work through light.**

The result of our direct experience in leading clinics across the world, TAO transforms practice management into an **intuitive, visual, and connected experience.**

With its **smart LEDs**, every drawer and material is instantly identifiable, always under control, exactly when and where you need it.

A silent revolution bringing efficiency and safety to every daily action

TAOTECH

WE REVOLUTIONIZED THE ENTIRE SYSTEM

to offer you organization that's faster and more intuitive than ever.
Thanks to smart LED lights, **each drawer lights up and communicates its contents**, visually guiding you through every task.

The LEDs are more than an aesthetic detail: they become a true operational ally, synchronizing every workstation with the day's workflow and your habits.

Every innovation begins with an idea, since 2019
TAO has changed the way the practice is experienced.
Now our promise is renewed: **TAO LED is born, designed for those who always choose innovation.**

THE PILLARS OF THE TAO REVOLUTION

contain

DBOX multi-functional tray
Capacious, modular, transportable.
An evolved container,
the perfect complement of TAO.

Boost efficiency with SmartStorage:
a complete range of modular elements
for every space and need..

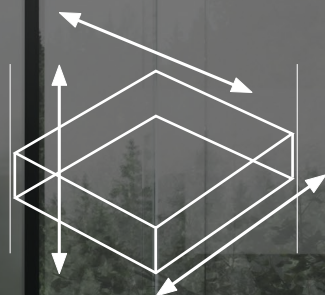

perfect mechanisms, smooth, precise. silent as a breeze. **innovation, in a whisper.**

fully equipped is standard

with TAO, the best is never an extra.

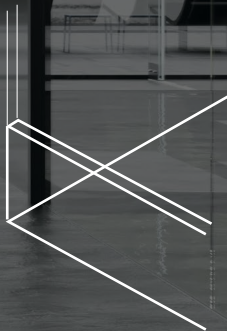

3D TRUE ALIGNMENT

4-way adjustments

REDUCED THICKNESSES

4 mm front thickness

AIRTIGHT CLOSURE

closing drawer.

"collapsible" seal.

Full extension with micro-adjustments

You can fully open the drawers and easily access all their contents.

Multiple micro-adjustments can be made in 4 directions to achieve perfect alignment.

Ultra-slim front & sides

We have sculpted drawers, doors, and side panels from a single metal sheet only 4 mm thick, 74% less than the standard 15 mm.

We also reduced the gaps between drawers to cut total volume and create more space for you. Because minimalism is not just a matter of looks.

PENTA SEAL: stop contamination

We have wrapped each drawer with the same perimeter seal as the frame, similar to that used in refrigerators.

It is an exclusive TAO solution, designed to collapse, adhere to the surface, and ensure a truly airtight barrier.

The cabinet that recognizes and lights up

With TAO, technology becomes a tangible part of everyday practice. Each drawer is equipped with a **smart sensor** that detects the inserted tray and automatically activates the **LED light** in the assigned color.

Content identification is immediate, no labels, no mistakes: **the light instantly shows you what's inside each drawer.**

colour: light blue PANTONE 278 matt, yellow RAL1023 matt
worktop: Corian® "Glacier white"

DBOX

COVER

Protects the contents during transport. D-Boxes can remain open inside a drawer as they are sealed by PENTASEAL airtight gaskets.

SEPARATORS

The 2 modular elements can enable multiple compartments – large or small – to be arranged to suit the demands of each user.

HANDLES

More than a drawer insert, **DBOX** has handles that turn it into a very practical tray, easy to move so all materials are always close at hand.

The handle shape offers a firm and safe hold, and, because every drawer extends completely out, extraction is simple and secure.

TAGS

If you use color coding, you can add labels with an integrated chip. Colorful and always visible, even inside cabinets or SmartWall.

the heart of your daily organization

DBOX evolves with the TAO system.

The practical core of the system: each tray is linked to a color. As soon as it is placed in the cabinet, the sensor recognizes it and the LED automatically lights up in the assigned color.

Adhesive labels are history. Now, the light speaks.

TAG

colour identifies the content

You can use DBOX
in 3 different ways

traditional tray
removable container
handling and storage support

contain.

simplifying actions, everyday
that's innovation

DBOX lifts vertically

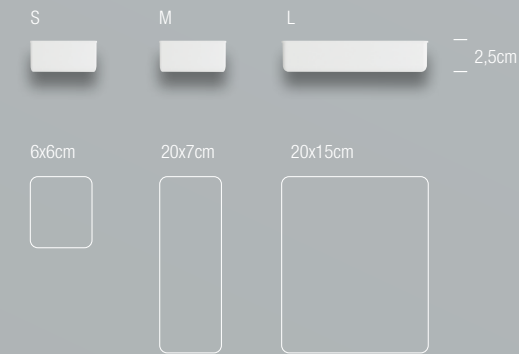

OPEN, TAKE, MOVE

The fully opening drawers eliminate hidden zones, exposing the whole content, making it easily reachable.

DBOX extraction is a fluid and natural as well as a "vertical gesture" that avoids obstacles or tilting.

The future of productivity, now.

Defining today the standard that will guide tomorrow

TAO introduces a **one-of-a-kind approach** to the operatory: smart trays, LEDs and integrated sensors that transform the cabinet into a true operational ally.

What others are still testing, TAO has already perfected, delivering organization management that elevates efficiency, precision, and control.

colour: grey WA7021 matt, light blue PANTONE 278 matt, red RAL3001

colour: white WA010 matt, grey WA7021 matt
worktop: Fenix NTM® "Nero Ingo"

LED

organize **with colour**

with TAO LED, color becomes a language:
choose whether it speaks **about what it holds**
or **about the people who use it**.

A

define **the content**

The most practical way to classify
the contents of every drawer

restorative

preventive

endodontics

B

define **the user**

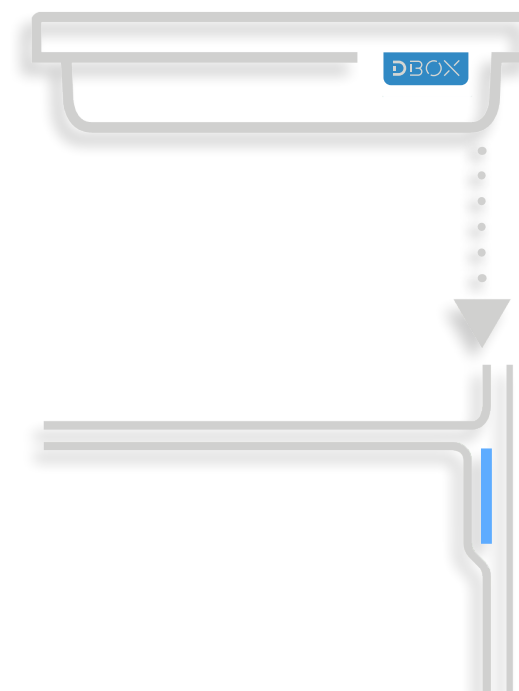

You can also reserve spaces for different users
within the same operating room, or link the color
to those used in the appointment
management software.

user 2

TAG+
DBOX

welcome, **smart tray**

NFC chip tags and sensors in the cabinet
communicate with each other and turn every drawer
into an **intelligent organizational tool**.

The learning curve of color
coding is quick and intuitive,
a natural way to group
and store products.

Each DBOX comes with a unique ID,
already set up to host additional data
and interact with third-party software,
enabling material tracking within the practice.

NFC chip-integrated tags, available in 8 colors

Evolution: step by step or all at once?

TAO adapts to your pace.

If you prefer to keep your usual routines, you can start with a "traditional" configuration that already integrates the technology of a scalable system.

No need to change everything in one day:

TAO grows with you, unlocking new possibilities for organization, efficiency, and method whenever you want.

So the transition is never an obstacle,
but an advantage.

colore: rosso RAL 3001, grigio RAL9006 (zoccolo)
ripiano: Fenix NTM® "Bianco KDS"

SmartSpace™: your entire practice in one cabinet

TAO's local storage, containing everything you need

SmartSpace is a temporary workspace designed for proximity storage. Practical and always available, it holds the DBOX units moved from other drawers.

inside TAO

local storage

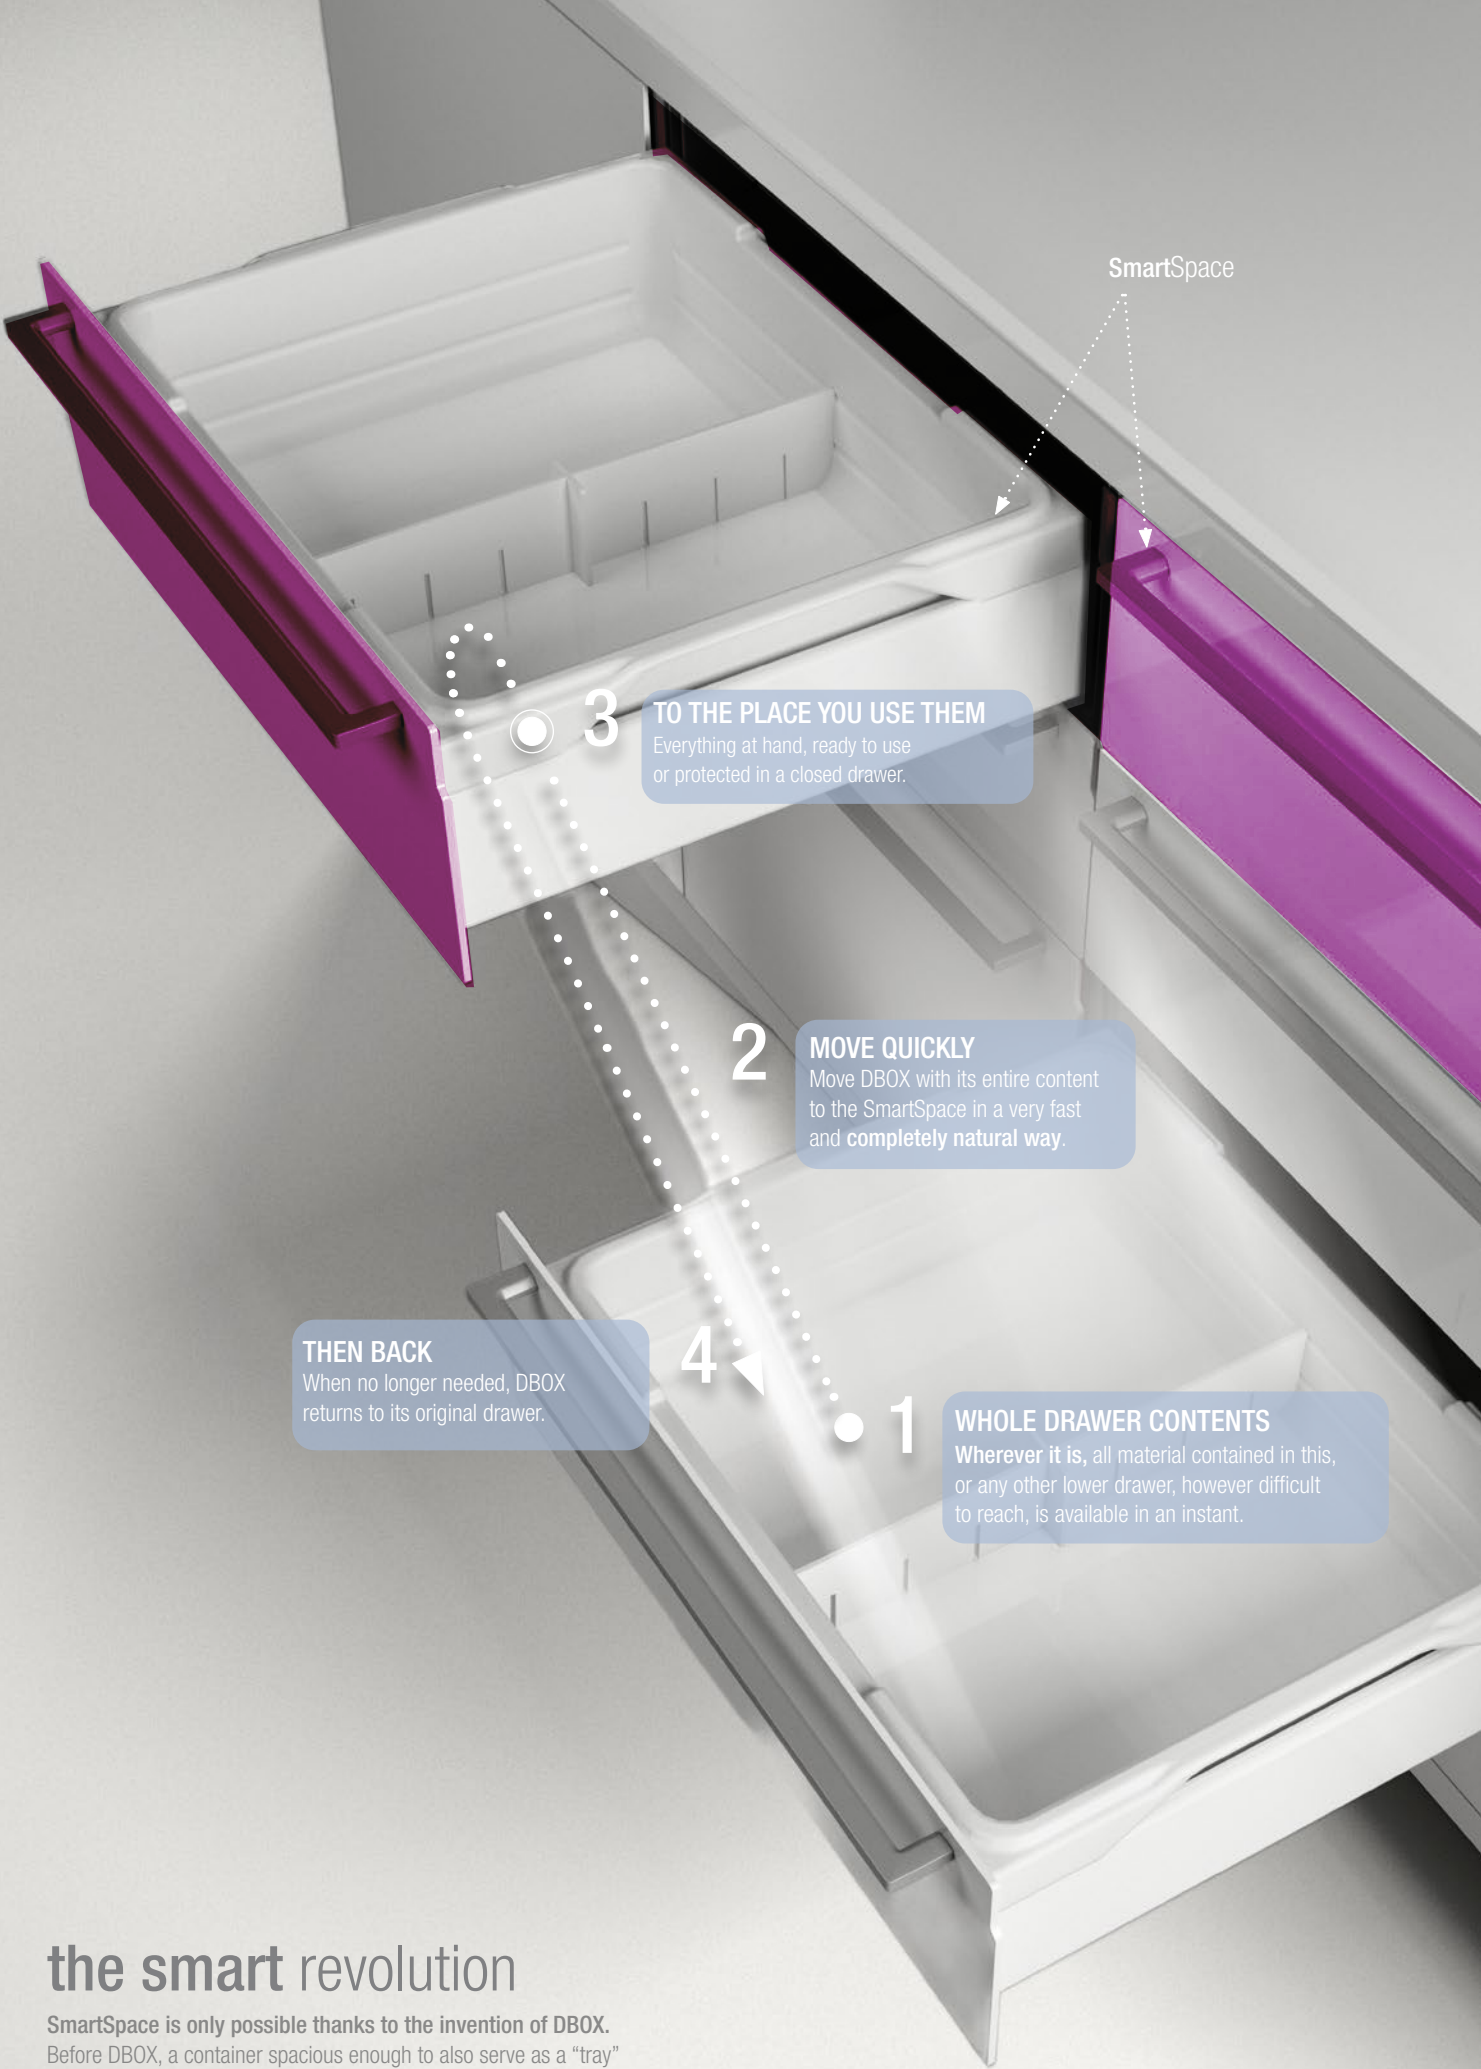

Material organized and stored in drawers

upper central drawers

SmartSpace

The whole DBOX moved to any SmartSpace drawer

DBOX makes local storage faster, more efficient, practical, and secure. Every drawer, even the farthest one, is now within reach.

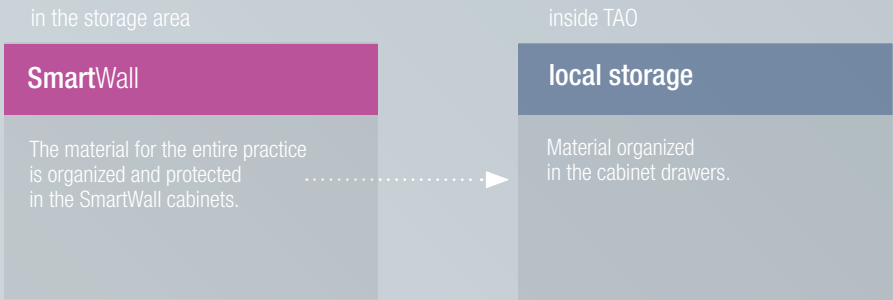

the smart revolution

SmartSpace is only possible thanks to the invention of DBOX. Before DBOX, a container spacious enough to also serve as a "tray" simply did not exist.

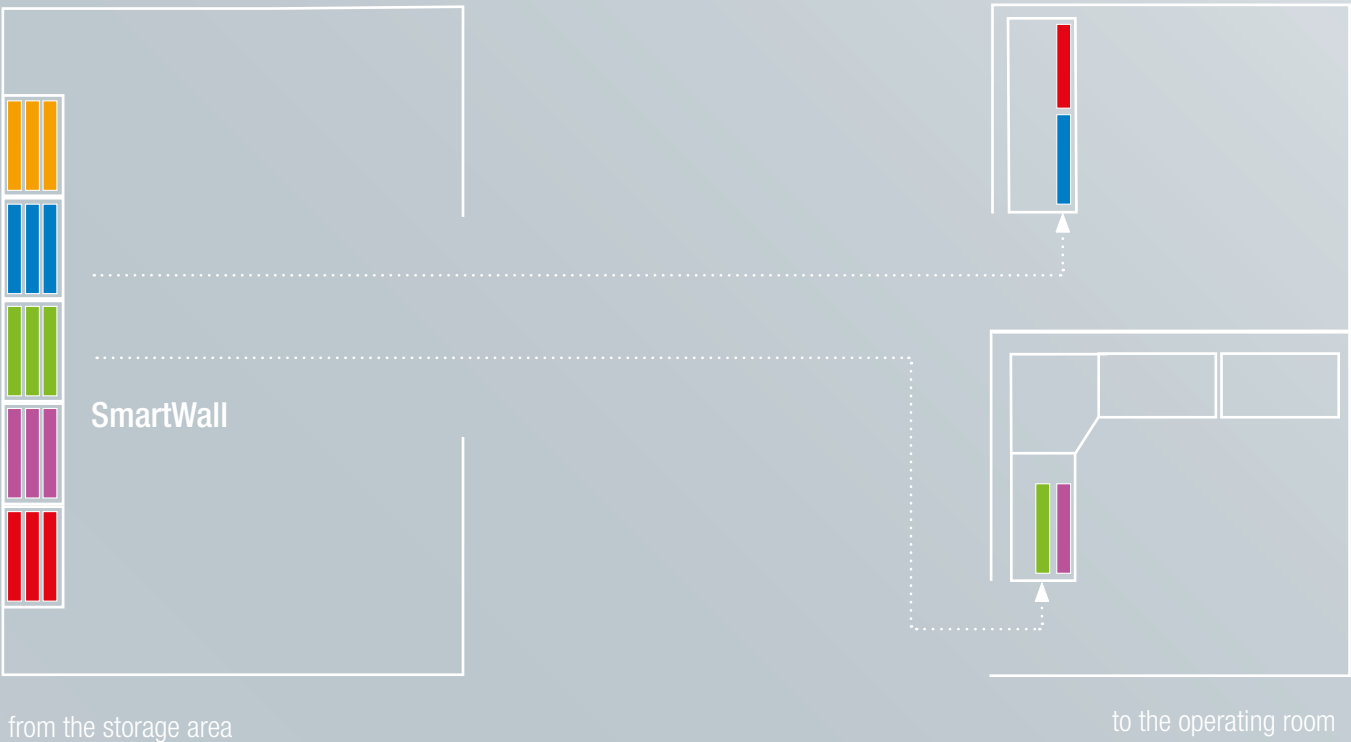

SmartWall™: the centralized storage

SmartWall is the perfect combination of DBOX and centralized storage.
A complete range of modular elements for every space and need.

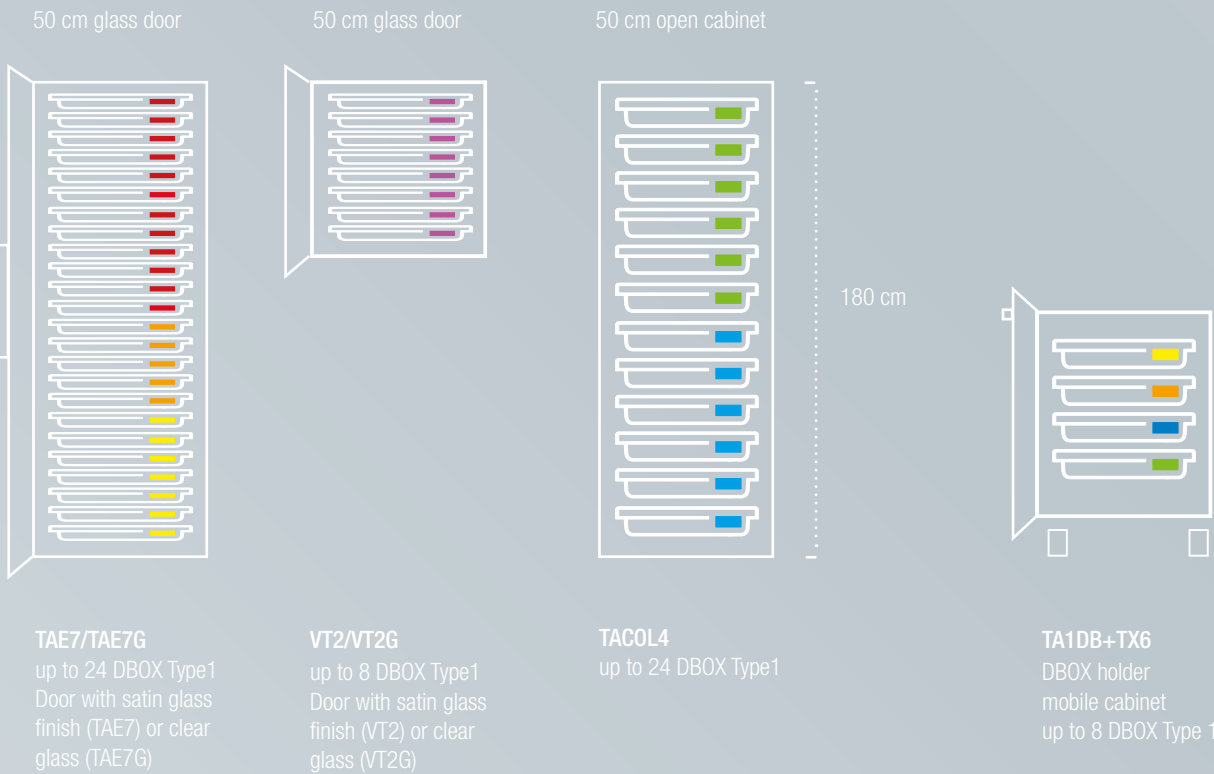

a single storage space

to supply all operating rooms

The drawer, in its lowered position,
is accessible while you are seated
and keeps material protected from
contamination during procedures

eyes and people hands quick and steady

synchronized and precise movements
a continuous, motionless dance
universal harmony

flexdesk™

Everything at hand

Right- or left-handed,
two- or fourhanded.
The mobile tray follows your
movements and the instruments are
always there, at hand, right where
you look for them.

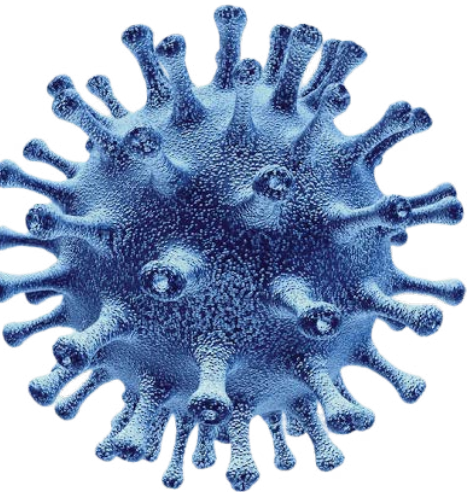

flexclip™

Suction system no longer on chair

The ability to choose the optimal
suction system position for every
process allows you to maintain a better
posture, facilitating your movements.

Metal

the irreplaceable hygiene companion

metal is our deliberate choice:
it allows safer sanitization
and respects the environment

We believe in it, we know it deeply,
we have worked with it forever: with passion,
experience, dedication.
We pay attention to every fold, to the smallest weld,
and remove every roughness: it is from these details
that style is born, ours.

WOOD
**Porous, it absorbs liquids, and can host colonies
of bacteria and mold on its surface and within its
cavities.**
In medical environments, it exposes to the risk of cross-
contamination during cleaning and maintenance.

METAL
**Non-porous, therefore an effective barrier
against environmental contamination.**
Materials and liquid residues do not penetrate the cabinet
and are removed through normal cleaning operations.

	The metal in the furniture	The wood laminate furniture
Average Lifetime	20 - 30+ years	7 - 15 years
Resistance to Moisture	Excellent no swelling or warping	Low prone to swelling and delamination
Resistance to Chemicals & Cleaning	High withstands daily disinfection	Moderate surface and edges degrade
Durability	Scratch and impact-resistant	Prone to chipping, fading, and edge wear
Maintenance	Minimal long-term reliability	Frequent replacement or repair
Investment Value	Long-term cost savings	Higher replacement costs over time
